PROFESSIONAL EXPERIENCE

KB Web Studio LLC - Owner/Freelance

Senior Frontend Developer | December 2023 – Current

- Successfully complete 10+ projects for top clients including Abbot's, Raising the Bar, Rohit's, and Top Glow Lighting.
- Develop custom websites, including tailoring eCommerce platforms and responsive designs, while integrating APIs and building custom blocks for enhanced functionality.
- Implement advanced SEO strategies and performance optimizations to elevate site visibility and user experience, driving improved traffic and engagement.
- Manage end-to-end client relationships, from initial consultation and project scoping to final delivery and ongoing support.

AFS LOGISTICS

Frontend Software Engineer | November 2021 – December 2023

- Engineered reusable components and libraries in Vue.js, streamlining code efficiency and accelerating development timelines.
- Integrated backend services with the Vue.js frontend to ensure smooth functionality and optimal performance.
- Led the development of key features, such as user account and password management pages, supporting over 500 user and admins.
- Developed and maintained automated frontend tests, ensuring high-quality standards through thorough debugging.
- Actively engaged in agile processes, contributing to daily stand-ups, design discussions, and conducting comprehensive code reviews.

SPARC GROUP - Lucky Brand, Brooks Brothers, Nautica, and Aeropostale

Frontend Software Engineer | October 2020 – October 2021

- Spearheaded the development of 70+ features and landing pages across four e-commerce platforms.
- Partnered with the design team to translate Figma prototypes into dynamic, mobile-responsive user interfaces.
- Optimized system scalability and usability for seamless responsiveness across desktops, tablets, and 15+ devices.

LUCKY BRAND

Frontend Software Engineer | July 2018 - October 2020

- Developed advanced sorting and filtering solutions for product pages using AJAX and JSON, boosting sales.
- Developed and optimized responsive front-end apps using JavaScript, improving load times and conversions.
- Led SEO optimization, improving search rankings and ensuring clean, maintainable code.
